PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of experience building high-impact web applications across high-growth startups (B2B SaaS, Healthtech) and large-scale enterprise environments (Fintech). I bridge the gap between design concepts and production code—specializing in server-rendered applications, Next.js, TypeScript, Tailwind CSS, and clean semantic HTML. Adopting Spec-Driven Development (SDD) with AI-assisted tools (Cursor, OpenSpec), I accelerate feature prototyping while maintaining full ownership of code quality, performance, and UI polish for complex data interfaces.

CORE SKILLS & TECH STACK

- **Core Stack:** React, Next.js, TypeScript, Tailwind CSS, Node.js, Turso/SQLite, PostgreSQL
- **Architecture & Methodology:** Spec-Driven Development (SDD), AI-Assisted Workflows (Cursor, OpenSpec), REST APIs, Server-Side Rendering (SSR)
- **Quality & Automation:** Playwright, Jest, Cypress, React Testing Library, CI/CD pipelines, Git/GitHub, Docker
- **UI Engineering:** UI/UX Sensibility, Responsive Web Design, Component Systems, Micro-interactions

WORK EXPERIENCE

Charisma Business Intelligence — Fullstack Software Engineer

Apr 2025 – Present | São Paulo, Brazil

- Delivered full-cycle (0 to 1) software development in a fast-paced, high-growth startup environment, managing data modeling, full-stack architecture, and AI-driven solutions for process optimization.
- Applied Spec-Driven Development (SDD) using OpenSpec and Cursor to structure clear system specifications, accelerating full-stack feature delivery.
- Engineered high-performance full-stack applications (Node.js, Next.js, PostgreSQL) focused on system scalability and responsive UI.
- Applied Prompt Engineering to automate editorial workflows and structure unformatted data using AI.
- Built complex React dashboards integrating audit workflows and structured log monitoring.
- Managed modern infrastructure using Docker, Kubernetes, and CI/CD pipelines, alongside AWS storage and SSO security integrations.

Alice — Frontend Engineer

Jun 2024 – Dec 2024 | São Paulo, Brazil

- Worked in autonomous, agile product squads building high-performing, intuitive frontend interfaces (Vue 3, Jest) dedicated to member experience in a healthtech scale-up.
- Collaborated on AI initiatives with OpenAI solutions to scale healthcare workflows, ensuring robust test coverage and UI polish.

Itaú Unibanco (via BRQ) — Frontend Engineer

Sep 2021 – May 2024 | São Paulo, Brazil

- Engineered mission-critical microfrontends at enterprise scale for Latin America's largest private bank, operating under strict compliance, accessibility, and security standards.
- Developed microfrontends using Angular, TypeScript/JavaScript, HTML, CSS, and Voxel (Itaú's design system).
- Implemented comprehensive unit tests with Jest, end-to-end testing with Cypress, and versioning with Git under AWS-managed CI/CD infrastructure.

FEATURED PROJECTS

BipFly — Fullstack Flight Tracker Application

- Fullstack application for automated, continuous flight fare tracking on Google Flights.
- Features a resilient Playwright scraper orchestrated with an async mutex lock to prevent memory exhaustion in container environments.
- Utilizes hybrid LibSQL persistence (local SQLite / Turso Cloud) and Recharts for price trend visualizations.
- Engineered using Spec-Driven Development (SDD) with OpenSpec and Cursor for rapid, highly-structured end-to-end iterations.

EDUCATION

Associate Degree in Systems Analysis and Development

Universidade Anhembi Morumbi | 2021 – 2024
